
ST-12 series

Description

Description

The SEKI ST-12 Thermal Cut-Out is a compact thermal protection device designed to safeguard electrical equipment from excessive temperatures. It operates using a snap-acting bimetal element that has been calibrated during manufacturing to activate at a specified temperature point. The unit can be supplied with preset operating temperatures ranging from 60°C up to 150°C, available in increments of 5K.

Applications:

Hair Dryers, Electric Fan Heaters, Popcorn Machines, Electric Ovens, Dish Dryers, Blowers, Small Home appliances, etc.
